EDUCATION

The University of Texas at Dallas, *Software Engineering, B.S.*
Expected May 2020

EXPERIENCE

The Home Depot, *Software Engineer Intern* | May 2018 – August 2018
Worked in a team of two to build an internal-use full-stack web application using Node.js, HTML, CSS, and JavaScript. Implemented Gulp to automate and enhance workflow. Performed regular code reviews to ensure exemplary code quality.

Emcee Agency, *Frontend Developer Intern* | May 2017 – July 2017
Built and designed a responsive and user-friendly website for a new, open-source build system. Integrated logging to understand design flaws within the website.

IntelliChoice, UT Dallas EPICS, *Web Developer* | January 2017 – May 2017
Implemented two features to make the IntelliChoice attendance system user-friendly and the enrollment process less tedious for branch managers and the IntelliChoice students.

SKILLS

HTML, CSS, JavaScript, Java, C/C++, Node.js, Git, GitHub, Linux

PROJECTS

Quack, *Hack NYU Sponsor Prize Winner*
A leap motion game that detects users' hand gestures and uses that to teach basic American sign language.

Daily Motivation
A Chrome extension that motivates users by providing a motivational quote with every new tab. Currently motivating around 4,000 weekly users!

ACTIVITIES

Hack to Help, **Founder and Instructor** | August 2017 – present
Founded an organization that works towards teaching high school students the basics of web development while providing the students with the opportunity to use the skills learned towards furthering a good cause.

Quality of Life, **Volunteer Tutor** | January 2016 – present
Volunteered as a tutor to help elementary, middle, and high school students from marginalized families perform exceptionally in school in various subjects.
